## Report on use of alternate source of energy saving method adopted by college

Date: 03/01/2023

Colleges are the centre of motivation for the society and to convey the message of using conventional methods of energy saving our college works keenly. As a part of this Bio-floc unit of our college is operated through the electricity generated by the solar panel. The project is funded by The Energy and Research institute (TERI) under the scheme Bio-floc technology in Palghar to provide livelihood opportunities for the tribal community. The power of electricity is generated from the solar panel-Solar PCU 3.5KVA with 4 batteries having capacity of 200 AH and solar capacity having **3 KW** capacities which are **donated by TERI** to college.

We are thankful to TERI for providing us such facility and this helps us to convey the message about energy saving and this can be a role model through which society will be motivated to install similar projects.
