Field visit report (A.Y.- 2021-22)

Mokhada lake

The Department of Botany organized a field visit for the students of T.Y.B.Sc. Botany to the Mokhada lake on 23rd February 2022. Lake is located to half kilometer away from our college. This lake is primarily used by local people for washing water purpose. It is with an area of about 10 acres. It is shallow lake with well-built compound or fence. Our prime aim to visit this lake is study the pond ecosystem. This lake is with fresh water and consists of hydrophytic plants. The hydrophytic plants are with submerged, free floating and rooted type.

Some of the hydrophytic plants we have seen during the visit are as follows:

1. *Hydrilla*,
2. *Vallisneria*,
3. *Pistia*,
4. *Lemna*,
5. *Trapa*,
6. *Jussiaea*
