

Visit report (2018-19)

Saijal Water Filtration Private Limited, Mokhada

The Department of Botany organized a visit to Saijal water filtration private limited, Mokhada for the students of T.Y.B.Sc. Botany on 7th March 2019. It is located to one and half kilometer away from our college. This Saijal water filtration private limited, Mokhada is primarily used by local people for potable water. It is small scale industry. Our prime aim to visit this Saijal water filtration private limited, Mokhada is to study the various instruments available to water filtration and their working. This unit is with one lab for water testing, office, and filtration plant.

Total 10 students and 2 teachers were participated in this field visit.

Students have observed various parts and instrument of this unit during the visit are as follows:

1. pH meter
2. Laboratory
3. Sterilization unit
4. Water purification plant

Outcome:

1. Students get on hand knowledge regarding the various instruments used for water purification.
2. Students get inspiration for entrepreneurship.
3. Awareness is created regarding the essentiality of pure water among the students.
